RUNGROJ RUNGSARANON

Cloud Engineer | AWS Certified Solutions Architect - Associate

rungrojr.ball@gmail.com | Tel: 095-528-4138 | GitHub: github.com/Imperator7 | Portfolio: rungroj.dev

PROFESSIONAL SUMMARY

AWS Certified Solutions Architect - Associate (SAA-C03) with hands-on experience in managing and provisioning AWS cloud infrastructure using **Terraform**, **Linux command line**, **shell scripting (Bash)**, and **AWS CLI**. Proven ability to configure and manage core AWS services (**EC2, RDS, S3, Lambda, ECS, CloudWatch**), implement **CloudWatch monitoring and AWS SES email alerting**, automate **RDS schema migrations and backups**, and drive **cost optimization** with start/stop scripts and right-sized, low-cost resources. Strong problem-solving and communication skills with C1 English proficiency (**TOEIC 965/990**).

LICENSES & CERTIFICATIONS

- **AWS Certified Solutions Architect - Associate (SAA-C03)** | Sep 2026 - Sep 2029
- **Com7 Business Certified - Architecting on AWS Bootcamp (Batch 2)** | Jul 2026 - 1 of 16 participants (out of 100+) who passed the bootcamp exam and earned a sponsored AWS SAA exam voucher
- **TOEIC Listening & Reading: 965/990 (CEFR C1)** | Jan 2025

TECHNICAL SKILLS

- **AWS Cloud Services:** EC2, RDS (PostgreSQL), S3, Lambda, CloudWatch, Amazon SES, ECS Fargate, ECR, VPC, ALB, CloudFront, WAF, API Gateway, DynamoDB, IAM, SSM Parameter Store, Secrets Manager, ACM, CloudTrail, EventBridge Scheduler
- **IaC, Scripting & CLI:** Terraform (Infrastructure as Code, Remote State, State Locking), Linux Command Line, Shell Scripting (Bash), AWS CLI, GitHub Actions (CI/CD, OIDC), Docker
- **Monitoring & Alerting:** Amazon CloudWatch (Logs, Metrics, Alarms), AWS SES (Email Notifications), AWS CloudTrail
- **Database Management & Migration:** Amazon RDS (PostgreSQL 17), Database Migrations, Backup & Restore, Least-Privilege Role Separation, DynamoDB, MongoDB, SQL
- **Programming Languages & Tools:** Python, TypeScript, JavaScript (Node.js), SQL, Java, Git, GitHub, NestJS, Express.js, Next.js

PROJECTS

Movie Ticketing - AWS Cloud Infrastructure & Cost Optimization (Terraform, AWS CLI, Bash) **Oct 2026 - Present**

- **Provisioning:** Deployed a full-stack app (NestJS, PostgreSQL) on AWS in **ap-southeast-7** (Bangkok) using **Terraform**: VPC with public, private, and database subnets, Security Groups, ECS Fargate, **RDS PostgreSQL 17**, and a private S3 bucket behind CloudFront with AWS WAF.
- **Cost Optimization:** Kept the demo environment **low-cost** with an AWS Budgets alert by using ARM64 Fargate Spot, avoiding a NAT Gateway, and writing **Bash + AWS CLI** sleep/wake scripts that stop ECS tasks and the RDS instance when not in use.
- **Database:** Placed RDS in private subnets with enforced TLS, daily automated backups, separate database roles for migrations and runtime, and credentials stored in SSM Parameter Store.
- **Operations & Logging:** Ran database migrations and a nightly seed job as ECS one-off tasks scheduled with EventBridge Scheduler, with container logs sent to **CloudWatch Logs**.

Portfolio Website (rungroj.dev) - S3 + CloudFront (OAC) with Serverless Lambda & SES Email Alerting (Terraform) **Sep 2025 - Present**

- **Terraform Provisioning:** Hosted the portfolio on a private S3 bucket served through CloudFront with Origin Access Control (OAC), and provisioned ACM, API Gateway, AWS Lambda, DynamoDB, and least-privilege IAM roles using Terraform with remote state in S3 and state locking.
- **Automated Alerting & Email Notifications:** Developed and managed **AWS Lambda** functions integrated with **Amazon SES** and DynamoDB Streams to trigger automated email notifications for incoming events without impacting API latency.
- **CLI & Deployment Automation:** Automated static asset deployments to S3 and CloudFront cache invalidations using GitHub Actions (keyless OIDC authentication) and AWS CLI commands.

EXPERIENCE

Self-Directed Cloud & Software Engineering Training **Feb 2024 - Present**

- **Cloud Infrastructure & Linux CLI:** Earned AWS Certified Solutions Architect - Associate (SAA-C03) and completed extensive hands-on KodeKloud labs covering AWS resource provisioning (EC2, RDS, S3, Lambda, CloudWatch), Terraform automation, Linux command line administration, and Bash scripting.
- **Application & Database Development:** Transitioned from civil engineering via DevCamp bootcamp (Feb - May 2024) and built fullstack applications using PostgreSQL, Express and Docker, gaining hands-on experience in SQL queries, database migrations, and system debugging.

EDUCATION

Chulalongkorn University - Bachelor of Engineering in Civil Engineering **Bangkok, Thailand | 2024**
